

FOR IMMEDIATE RELEASE

LASIK MD brings affordable, world-class laser vision correction to Hamilton

Hamilton, September 28, 2007 – LASIK MD, Canada's national provider for laser vision correction, is proud to announce the opening of its 19th clinic in Hamilton, Ontario. This new clinic will open its doors October 1st to allow residents from Hamilton and surrounding areas to benefit from LASIK MD's world-class medical care offered at an affordable price.

LASIK MD Hamilton is conveniently situated in the newly developed Heritage Hills Plaza located at 276 Mud Street West.

According to Dr. Mark Cohen, President and Medical Director of LASIK MD, Hamilton was a natural choice: "Hamilton is the third largest metropolitan area in Ontario. Therefore, it made sense for us to open a clinic here to better serve patients who would have had to otherwise travel to Mississauga or London for the closest LASIK MD clinic."

LASIK MD provides free consultations to those who are interested in laser vision correction. Prior to each patient's surgery, LASIK MD conducts a complete and thorough eye exam, using the latest technology, to accurately evaluate each patient's candidacy.

Similar to other LASIK MD vision centres across Canada, LASIK MD Hamilton is staffed with an experienced team of eye care professionals, and is equipped with technologically advanced lasers and diagnostic equipment. This sophisticated technology allows LASIK MD to offer patients the choice of traditional laser vision correction and advanced custom wavefront procedures.

Laser vision correction is the most popular elective procedure in North America. Over 1.4 million procedures were performed just last year.

LASIK MD is the leading provider of laser vision correction in Canada. LASIK MD's surgeons are among the most experienced in North America having performed over 400,000 procedures. LASIK MD uses state-of-the-art equipment from the world leader in laser vision technology, Bausch & Lomb. The company offers the highest standard of care at the most affordable price. For more information on LASIK MD or laser vision correction, visit www.lasikmd.com or call (905) 578-1115.
